PRODUCT CASE STUDY · M V SAI RAVI KIRAN · PRODUCT OWNER

SQL Practice Ground

Learn SQL through workplace scenarios and a staged practice path.

Role	Category	Live on	Status
Product Owner	Education / Developer Tools	Web, Android, Windows	Live

Overview

An interactive SQL learning platform organised around a six-stage learning journey and practical workplace scenarios.

Target users

Students and exam aspirants who need focused, low-friction practice they can return to daily.

My role

Product Owner and independent product builder.

The user problem

Learning SQL syntax alone does not prepare learners to answer real reporting and analysis questions.

Key product decisions

A staged practice path connects SQL exercises with workplace scenarios, reports, and data aggregation.

1	Six-stage SQL learning path
2	Workplace scenario practice
3	Report-building exercises
4	Data aggregation practice

Trade-off

Prioritised depth of practice over social and gamified extras so the core learning loop stayed fast.

Verified outcomes

Live on the web and in the Microsoft Store; the product website carries the product experience and availability details.

Metric	Status
Active users	Not yet provided
Downloads / installs	Not yet provided
Store rating	Not yet provided
Retention	Not yet provided

Only figures backed by a source are reported. No metrics are estimated.

Signals I track next

- Practice sessions completed per learner
- Return visits within an exam cycle
- Drop-off point inside a test
